

Integration with Microsoft Power BI

YourDataConnect has developed a solution to transfer metadata between Microsoft Power BI and YourDataConnect.

Microsoft Power BI

Microsoft Power BI offers cloud-based business intelligence services that provide non-technical users with tools to analyze data and share insights. Power BI's user interface is intuitive as users can explore the data behind their dashboards with one click. Using the Power BI gateways, the user can connect SQL Server databases, Analysis Services models, and many other data sources. Figure 1 shows a dashboard in Microsoft Power BI.

Figure 2 shows a report in Power BI.

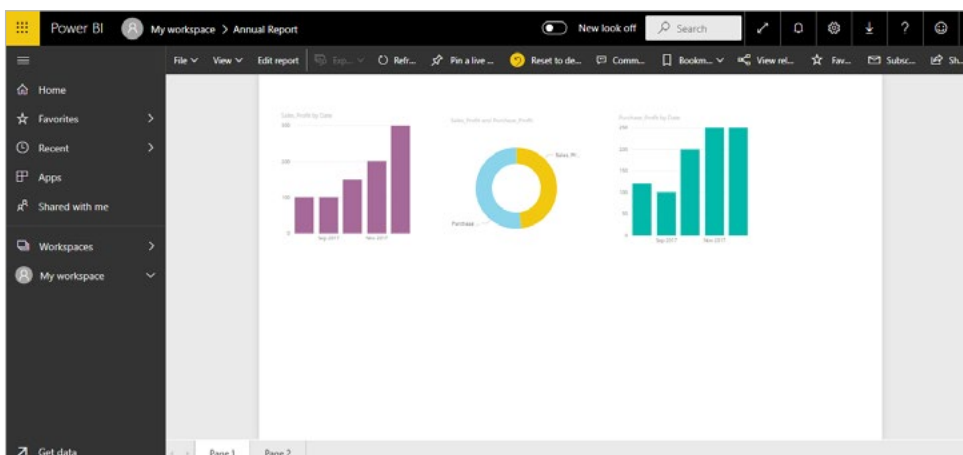

Figure 2: Report in Power BI.

Integration of Microsoft Power BI with YourDataConnect

YourDataConnect has developed a solution to import dashboard, report, tile, dataset, and table metadata from Microsoft Power BI into YourDataConnect while maintaining the hierarchy between Power BI objects (see Figure 3).
