

# Integration with ServiceNow CMDB

YourDataConnect has developed a solution to ingest metadata from ServiceNow CMDB.

## ServiceNow CMDB

ServiceNow CMDB is a single system of record that can maintain configuration data related to an organization's application infrastructure. ServiceNow CMDB enables IT departments to better manage the technology infrastructure, especially in the areas of business service impact analysis, asset management, and compliance. Figure 1 shows the application inventory in ServiceNow CMDB.

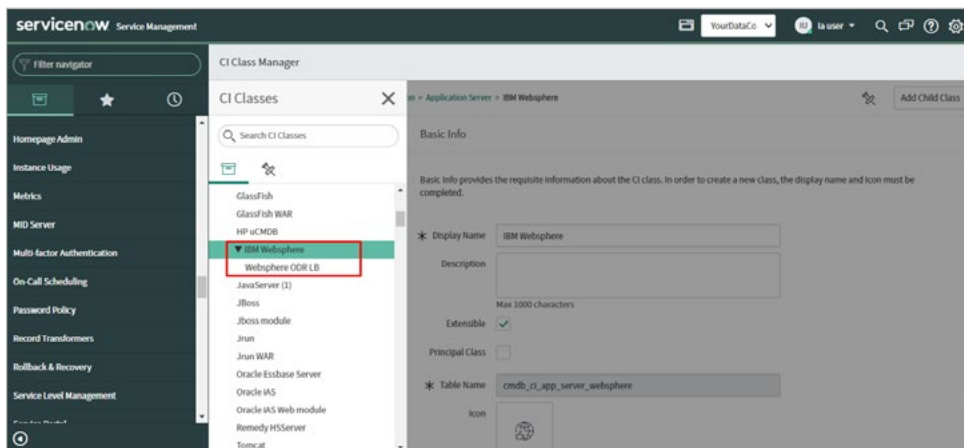

Figure 1: Application inventory in ServiceNow CMDB.

## Integration of ServiceNow CMDB with YourDataConnect

YourDataConnect has developed a solution to ingest application metadata including parent-child relationships from ServiceNow CMDB (see Figure 2).

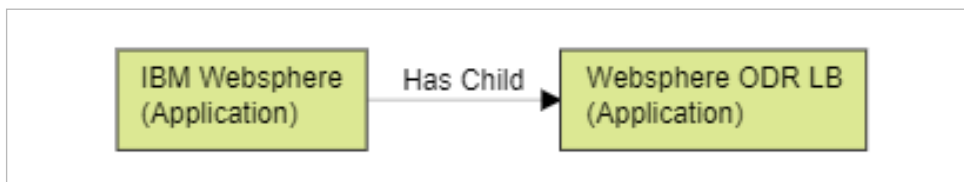

Figure 2: End-to-end traceability of ServiceNow CMDB objects in YourDataConnect.

To learn more about this solution, please request a demo by contacting [info@yourdataconnect.com](mailto:info@yourdataconnect.com) or visit our website at [yourdataconnect.com](http://yourdataconnect.com).
