

Manufacturing

YDC supports data monetization for the manufacturing industry through a data balance sheet covering all data assets and data liabilities associated with:

- Product master data management/product information management (MDM/PIM)
- Product lifecycle management (PLM)
- Supply chain management (SCM)
- Risk management and regulatory compliance

Figure 1 shows a sample manufacturing data balance sheet, including a Product asset.

ASSETS		LIAB_EQUITY	
ANALYTICS	\$0	DATA_MGMT_EXP	\$816,974,409
REPORTS	\$0	UNEXPLAINED	-\$678,634,409
TECHNOLOGY	\$0	TOTAL LIAB_EQUITY	\$138,340,000
APPLICATIONS	\$0		
DATABASES	\$0		
VENDORS	\$0		
CUSTOMERS	\$100,000		
CUST_DATA	\$50,000		
ACCT_REC	\$50,000		
INVOICES	\$50,000		
MACHINE DATA	\$0		
PRODUCT	\$138,240,000		
TOTAL ASSETS	\$138,340,000		

Figure 1 shows a sample manufacturing data balance sheet, including a Product asset.

Figure 2 shows the traceability of the Product data asset to a business case used to value the asset and to other financial, business, and technical metadata relevant to the business case.

Benefits

This solution provides several benefits:

- A predefined data balance sheet for the manufacturing industry with suggested business cases for valuing manufacturing data
- Prebuilt integrations to master data management solutions, business glossaries, data catalogs, data quality platforms, and other software commonly used by the manufacturing industry for automated valuation of key data
- End-to-end traceability of your data assets and data liabilities to financial metadata, business metadata, and technical metadata

Next Steps
